

WORK EXPERIENCE

2021 – PRESENT

CASA DO SABER

Technical Lead / Senior Frontend Engineer

- Worked in the completely refactor of the mobile app, also implemented CI/CD and End-to-End tests. Now we're able to delivery new releases continuously to our base with over 120k users.
- Implemented a new frontend architecture using monorepo that makes the team speed their productivity and delivery in more than 60%.
- Designed and implemented new backend architecture to our streaming platform, that will help us to scale our product.
- Act as team leader where I have to make risk assessments, motivate the team and take care about their health and welfare in same way we keeping going to archive our goals.
- Perform code reviews and code quality assurance to guarantee that best practices are being applied.

LIGHTHOUSEIT

Senior Software Engineer

- Implemented a new tech stack that included React Native, React.JS and Node.JS and it makes the recruitment process faster.
- I lead and was the principal engineer in a big e-commerce mobile app where I chose the React Native as the main stack of development. Couple months after the launch of the app the monthly sales revenue increased from \$500K (R\$2.6KK) to over \$1KK (R\$ 5KK).
- Migrated more than 10 mobile apps that were built and deployed locally to a fully automated CI/CD pipeline.

HOBBIES

Kart racing is actually my favorite hobby! I really love motorsports in general and I already went to the F1 Brazil Grand Prix. Someday I'll drive a F1 racing car!

TECH LEAD / FRONTEND ENGINEER

DONALD SILVEIRA

donaldsilveira@gmail.com

Porto Alegre, RS, Brazil

“

I'm a Frontend Engineer with more than 10 years of experience with mobile and web development, also as a team lead.

I have much love and familiarity with Javascript and your major frameworks and libraries. I also love to research and learn about UI/UX, software architecture, best practices, team leadership and other subjects.
