Summary

I'm a Frontend Engineer with more than 10 years of experience creating and implementing several projects, with very careful attention to detail and user experience, unified with the ability to solve problems in a timely and accurate way.

In the last 8 years, I have been working and releasing large-scale web and mobile apps. More than the technical side of the work I know the importance of time management and open communication.

Over the course of my career, I did some notable contributions:

- Lead two successful large-scale mobile apps.
- Scaled companies and products by implementing better software architecture like domain-driven design and encouraging a data-driven culture.
- Increased deliveries and deployment confidence by implementing testing methodologies and DevOps culture.
- Improved team productivity by implementing Agile methodologies.

Experience

Technical Lead

Casa do Saber

Nov 2021 - Present (1 year 1 month +)

- Act as team leader where I have to make risk assessments, motivate the team and take care about their health and welfare in same way we keeping going to archive our goals.
- Perform code reviews and code quality assurance to guarantee that best practices are being applied.

Senior Mobile Engineer

Casa do Saber

Aug 2021 - Present (1 year 4 months +)

- Worked in the completely refactor of the mobile app, also implemented CI/CD and End-to-End tests. Now we're able to delivery new releases continuously to our base with over 120k users.
- Designed and implemented new backend architecture to our streaming platform, that will help us to scale our product.

Senior Software Engineer

Lighthouse Innovation & Technology

Nov 2016 - Jul 2020 (3 years 9 months)

- Implemented a new tech stack that included React Native, React.JS and Node.JS and it makes the recruitment process faster.

- I lead and was the principal engineer in a big e-commerce mobile app where I chose the React Native as the main stack of development. Couple months after the launch of the app the monthly sales revenue increased from \$500K (R\$2.6KK) to over \$1KK (R\$ 5KK).
- Migrated more than 10 mobile apps that were built and deployed locally to a fully automated CI/CD pipeline.

Frontend Developer

Moovin Plataforma E-commerce

Jun 2014 - Nov 2016 (2 years 6 months)

- Developed a low code template builder for the e-commerce platform, that helped to increased the sales in more than 45%.
- Integrated more than 20 marketplaces with the platform.
- Developed a price monitor that required to develop a scalable web scraper API to extract products prices from lot of competitors.

Frontend Developer

Medialine - Soluções Digitais

Apr 2011 - Jun 2014 (3 years 3 months)

My first job as a software developer and I worked in various projects but more focused in frontend.

Was a great opportunity where I could learn a lot about software development, team management and leadership.
